Experience

Content Developer/Data Analyst

Industrial Training Services   *2019 - Current*

- Developed mobile- and desktop-friendly website(s) for new product lines as well as performed fixes and new features for existing web pages using HTML, CSS, and JavaScript.
- Produced new content and information extensively through SQL queries and procedures.
- Created hundreds of custom content exams from start-to-end through in-house software, HTML, CSS and project management through Trello boards and daily stand-ups.
- Managed Wordpress website used by thousands of users daily.

IT Support/Database Management

D&D Shoe Company   *2017 - 2018*

- Found solutions to multiple hardware and software errors.
- Automated SQL backups on a daily schedule.
- Deployed primary product-display website using Bootstrap.

Skills

HTML, CSS, JavaScript, SQL, React, GIT

Developed multiple projects utilizing all listed languages, and have extensive experience working with a team of diverse roles and people to produce content engaged with and used by thousands of pipeline engineers. Comfortable understanding of GIT version control and command line usage.

Project Management, Customer Relations

Brought multiple large-scale projects from start-to-deployment through Trello boards as well as extensive interactions with fellow teammates. Interacted with clients to foster positive relationships, accrue feedback for future services, and serve client needs on-demand with fast response times.

Education

Murray State University

Bachelor of Arts with a Major in Computer Science, Minor in English
